

Compelling rationales that sets EzSlate apart

EzSlate is an **NEP2020 compliant**. Below are the key incorporated principles -

1. Equity & Inclusion – With EzSlate, teachers can track the students that attend classes, tests and group activity regularly ensuring **student retention rate**. With its automated grading (except open-ended questions) and reporting features, **teacher bias can be eliminated** ensuring **equality** in students' treatment.
2. Competency based learning outcomes – EzSlate's assignments, quizzes, case studies and modules, all have **learning outcomes and competencies** that are integrated as per NEP's new assessment requirements.
3. Community Participation – EzSlate provides easy-to-use, mobile, social, intuitive, personalised set of tools and resources enabling all stakeholders (students, teachers, management and parents) to **participate collectively**.
4. Use of Technology –EzSlate is **cloud hosted and SaaS** based LMS which is fast, reliable, secure, engaging learning and teaching experience. Making **it accessible anywhere, anytime and on device**.
5. Emphasize Conceptual Understanding –EzSlate provides quizzes, gamification of lesson activities like word search, drag and drop and other learning exercises that help in **understanding key concepts and ideas** whilst making learning **fun and engaging**.
6. Critical thinking & Creativity – Games and exercises are curated in such a way to allow the students to have an experiential learning which develops their **critical and creative thinking**.
7. Continuous Review – With AI based analytical reports, teachers **can analyse and review** student academic progression periodically ensuring **early intervention** if needed.
8. Teacher upskilling - A trained teacher can add training content as a course with EzSlate and automate the training process. Thereby creating opportunities for **teachers to upskill online** and support **School-wide resource sharing**.

With EzSlate, implementing NEP2020 has never been more effective and efficient.

Increased Student engagement

- With EzSlate's gamification of learning activities, built-in live virtual classroom with **lesson recordings** and **multiple-user virtual whiteboard** (supporting both teachers and students' participation just like in a physical classroom) ensures

- A **fun and engaging** way for students to understand and **grasp key concepts and ideas**
- They can **learn at their own pace**.
- They can **collaborate with their peers and teachers** using social tools such as discussion forums, chat, emails, wiki etc.

- Teaching faculties can propagate **different learning styles** by offering personalized modules and courses that aim at **student academic growth**.

Reduces teachers' Work load

- EzSlate provides comprehensive yet easy-to-use media-rich content tools set to enable educators to **quickly build creative, engaging and interactive** content.
- The robust content management supports **multiple file formats and multiple languages** ensuring quick upload of instructors' teaching resources.
- Access to content management would mean **access to all teachers' valuable learning material** without being affected by **teacher attrition rate**.
- Quizzes, assignments, assessments, case studies etc. can be issued in **timely and cost-effective manner** by simply selecting and assigning from existing resources.
- Integrated and automated (except open-ended questions) **grading** (including **Rubrics**) implemented across multiple learning activities will **free up teachers' time and energy and direct it** where necessary.
- We can procure and integrate **proctoring and plagiarism** tools to **eliminate malpractices** during assessments and examinations.
- Teachers and the school can use **integrated calendar** to **plan their** curriculum (chapters or lesson), events, announcements and assessments

Improved Students, Teachers' performance

- EzSlate's AI based analytical reporting feature gives **insights** that help schools and universities make **more informed decisions**.

- Teachers can **easily identify** students who need **extra support across subjects**. Similarly, students who are bright in a subject can be **encouraged to hone their skills further**.

- It allows teachers and administrators to **identify gaps or areas for improvement**. □

School can set different **Key Performance Indicators (KPIs)** for tracking students' interaction with courses, how much time they spend on assignments, what devices they are using, and much more.

- You can similarly set KPIs for your **teachers' performance**, track and review them periodically.

All the above features are designed for **blended Learning** system hence learning can continue beyond the classroom.
